EDUCATION

University of California, Los Angeles

June 2027

Bachelors of Science in Data Theory

GPA: 3.5

Pasadena City College, Pasadena

June 2024

Associates of Art in Engineering and Technology

GPA: 3.8

Relevant Coursework: Linear Algebra and Applications, Data Science Fundamentals, Multivariable Calculus, Differential Equations, SQL, C++, Java, Data Structures, Statistical Analysis with R/Python

SKILLS

Language: Python, R, C++, Java, SQL, HTML/CSS

Developer Tools : VS Code, PyCharm, Git, RESTful API, Pandas, Matplotlib, Plotly, Numpy, Scipy, RStudio

Interests: Artificial Intelligence (Machine Learning, Deep Learning, NLP, Computer Vision), Data Analysis, Big Data, Medical Applications of AI

WORK EXPERIENCE

Dr. Paul Boutros Lab, Cancer Data Sciences UCLA

Los Angeles, CA

Undergraduate Researcher

August 2024 – Present

- Utilized advanced statistical methods and machine learning algorithms to analyze large-scale medical datasets in R, optimizing workflows through High Performance Computing (HPC).
- Collaborated with interdisciplinary teams to drive data-driven insights and solutions.

The UPS Store

Burbank, CA

Store Associate

May 2023 – Present

- Collaborated with a team of 10 to maintain customer satisfaction, store cleanliness, and organized displays for 50+ products serving 300 daily customers.
- Managed inventory through regular stock checks and shelf restocking to ensure product availability.

PROJECTS

SQL Like Database Using C++

Pasadena City College, June 2024

- Developed a custom database engine in C++ that efficiently parsed and executed SQL commands, utilizing advanced data structures like MultiMaps and B+ Trees to store and manage data within binary and text files.

Predictive Salary Model

Pasadena City College, December 2023

- Designed and implemented a predictive analytics model using Least Squares Regression to analyze relationships between salary and years of experience, achieving a high R^2 value of 95%, demonstrating strong model accuracy.

Heart Disease Detection Using ML

University of California, Los Angeles, December 2024

- Developed Machine Learning models

RESEARCH EXPERIENCE

UCR Honors Student Research Conference 2024

- Presented research done regarding the current state of AI in Academia and possible future directions

Research paper on Artificial Intelligence titled “Transforming Learning Experiences”

- Researched the different ways in which AI has been actively used within schools to enhance learning
